To Prof. R.A. Fisher,
 University College
 Galton Laboratory
 Gower Street

London (W.C. 1)
England

Dear Sir,

Some years ago we sent to your address in Harpenden the results of about 200 uniformity trials (our letter of 18 January 1933 and your reply of 16 February 1933) with sugarcane, which were harvested in 1931.

I kindly beg to inform me if you already have studied this extensive material, and if it has led you to any results. Perhaps you or your students have already published papers on this material; if so, I would be very much obliged to receive these papers.

Thanking you in anticipation,

Yours Sincerely,

Johvan Dyk

October 8, 1937

Dear Yates,

I enclose a letter from Dr van Dyk, together
with a copy of my reply.

Yours sincerely,

R. A. Fisher

DR

October 8, 1937

Dear Dr van Dyk,

I have your letter of September 29th enquiring about work done on uniformity trials with sugar cane, sent to Rothamsted in 1933. This material, since its arrival, has been in the hands of Mr F. Yates, who succeeded me in that year as Head of the Department. I am, therefore, sending your letter on to him.

Yours sincerely,

Thanking you in anticipation,

Yours Sincerely,

John van Dyk
