

Ref No. *D147/57/38*

P. O. Box 159,

ZANZIBAR

EAST AFRICA

2nd February, 1938.

Dear Mr. Cochran,

Very many thanks for your letter of January 4th. I must apologise for the delay in answering, but we have just finished off a record clove crop.

2. In reply to the points you raise I have to reply as follows:-

- (a) the data presented represent the only known yields of individual clove trees conducted for more than one year.
- (b) the yields for five years for the individual trees are attached. Blank spaces in the plan sent with my original letter represent trees which have died during the course of the experiment and any individual yields from these trees in the first years of the experiment should be neglected.

3. From the attached individual tree yields you will appreciate the remark in para 2 of my original letter. It may be said that normally the production seems to have a five year cycle which includes one bumper, two average and two poor crops.

Trusting you have now all the information you require,

I am,

Yours sincerely,

DIRECTOR OF AGRICULTURE.

W. G. Cochran, Esq.,
Statistical Department,
Rothamsted Experimental Station,
Harpenden, Herts, England.

RWRM/LP.

Yields in lbs. per tree of Green Cloves for the
five seasons 1933-34 to 1937-38.

Plot K.B.C. Kizimbani.
